

About Us

- ▶ Benefit from 185 years of forging experience
- ▶ Get advice directly from engineers
- ▶ Standards for points systems

For decades, Bharat Forge CDP Railsystems has stood for first-class quality with outstanding expertise in the rail industry. Our engineering team designs trend-setting solutions, enabling efficient standardisation across the extensive points technology product range. Working closely with our customers, we make sure that projects are completed swiftly and reliably. Bharat Forge CDP Railsystems – laying the tracks for a secure future.

New Products

Pioneering advances made by Bharat Forge CDP Railsystems have led to a significant rationalisation of the points systems product range. These engineering designs represent long-term solutions to logistical challenges. Reliable. Low maintenance. Cost-efficient.

EVZ Toolkit

Saves time – saves effort. The EVZ Tool kit consists of two cases. It includes standard, professional tools for assembly and maintenance work on all common locking systems.

- ▶ Safe, orderly storage of tools
- ▶ Telescopic test probe 4mm

- ▶ Spanner with built-in magnets
- ▶ Box for all necessary spare parts and more
- ▶ Electric torque wrench for quick and easy assembly

Other products

Claw lock devices

New standards in points technology:

Our low-maintenance locking systems for switch rails and movable point frogs significantly reduce maintenance costs.

Hollow bearers

Designed for optimal protection:

Our hollow bearers mean the switch lock and mechanism can be fully integrated along with the test and control rods.

Switch roller device

Optimal for the track structure:

Our switch roller devices meet the highest technical standards and ensure smooth operation with low-maintenance.

Training Tool

Vital for any training course:

Perfect as a demonstration tool to explain locking systems. This plastic training tool comes in an aluminium case, making it easy to carry around.

Guard rail plates

The basis for safe track switching:

Our forged sliding chair and guard rail support plates are suitable for all common types of fixings, sleepers and rails.

Unibar

One system, all points:

Our universal connecting rod has an individual adjustment range, is compatible with all EVZ, BFLand WKV ranges and vastly reduces storage costs.
